

Design Philosophy behind ThunderChain Build a User-oriented Blockchain 3.0 Infrastructure

Media Report

Posted on Oct 17, 2018 Source: *Bittmint*

Since the cloud giant Xunlei unveiled its high-performance mainnet ThunderChain, there have been lots of questions and discussions around its infrastructure design and framework. For example, why is ThunderChain designed with a technical infrastructure that prioritizes TPS? Why ThunderChain uses PBFT consensus mechanism instead of the more popular POW and POS? Zhang Huiyong, R&D Director of ThunderChain Open Platform, recently explained the design philosophy behind ThunderChain to blockchain developers in Beijing at the first stop of ThunderChain Salon.
