Xunlei (XNET) and Onething Technologies CEO Mr. Lei Chen was invited by the World Economic Forum and attended the 12th Summer Davos held in Tianjin, China. He spoke at the Closing Panel on how to build China's innovative society in the Fourth Industrial Revolution. The panelists addressed the impact of emerging technologies on individuals and society, when China and other countries are moving forward into the Fourth Industrial Revolution.

Lei noted that there is a strong need to focus on research and development in the Fourth Industrial Revolution, especially around the fundamental science and technology like blockchain technology. He also shared his insights into the data ownership and data custody in the Forth Industrial Revolution.
